These are the students
who were in the 5 frames
class that I taught
at Lakeland today.

SRP at Elkdale. The mass of men are manipulated by external factors: the parent, the boss, the sergeant, and so on, and most people actually enjoy -- or at least appear -- being manipulated/ having someone else call the shots. Not I. I prefer/insist on autonomous control of my word/world. As such, I can lead my life with the greatest degree of simplicity possible. No question of life science and artist's life waltz & announce. Where does one conduct one's life? How does one conduct one's life? Who establishes the rhythm/rhythms? When do the rhythms change? Living at Elkdale has been excellent for me -- once again I can immerse myself in the flow of the season, once again I can re-learn what it means to work in the woods on a chilly October morning^{at 6:30 A.M. for example} when fog has enveloped the woods, as it did this morning. No cemetery was barely visible so dense was the fog. No truly had the impression that the fog could be cut with the proverbial knife. Living at Elkdale and being a substitute teacher is very good for me. I must have a large amount of time to myself on a daily basis. I must be the absolute master of my word. It is I who make the decisions that affect me and my word (to the greatest extent possible). I don't want plumbing, I don't want a central heating system, I don't want an indoor toilet. I consciously have chosen to "put aside" most of what most people would regard as basic necessities in order to live quietly, simply, peacefully, naturally. Every day is a new adventure. Every day is a new discovery. To live quietly and simply and peacefully and naturally on this earth of ours is not a hardship / is not difficult. No easier is a very malleable and flexible companion if we live simply. So what the earth tells you to do. Listen to the song of the earth. Listen! and then maintaining one's self becomes a pleasure-ful experience and in no way an anxiety-producing trial / hardship. Living simply and do does not mean that one cannot live elegantly. Certainly not, for I live in an elegant manner. To live as simply as possible means, in the long run, that you carry a great deal of life inside you, that you can actualize hopes and dreams of great magnitude, that you can pursue
